

Description

- The tap box is a great option for multi-tenant applications, taking power from utilities and distributing it to multiple end users. A three-point latching system and padlockable cabinet provide a secure enclosure.

Features

- Padlockable, three-point latching mechanism comes standard with all units
- Additional penta bolt locking mechanism (optional) to further protect against power theft
- Wall- or pad-mount installation options
- Stainless steel hardware kit included for pad-mount installation
- Lightweight aluminum enclosure
- Select models have a smaller footprint; ideal for applications with limited space
- NEMA 3R and NEMA 1 rated
- Aluminum powder coat paint finish helps prevent corrosion
- Multi-port ground lugs included
- Ideal for housing developments, strip malls & apartment buildings
- UL listed
